Link Project

Group 102-2
Jeff Colgan, Sai Maddhi,
Colin Moran, Andrew Wu

Link

- Link allows you to connect with friends, even if you're friends have completely different schedules than you.
- The target market is high school and college students
- Link let's you add your own schedule and compare it against your friends' schedules
- You can search for and add friends with their emails
- Easily schedule time with your friends and hang out when convenient for both of you using our product
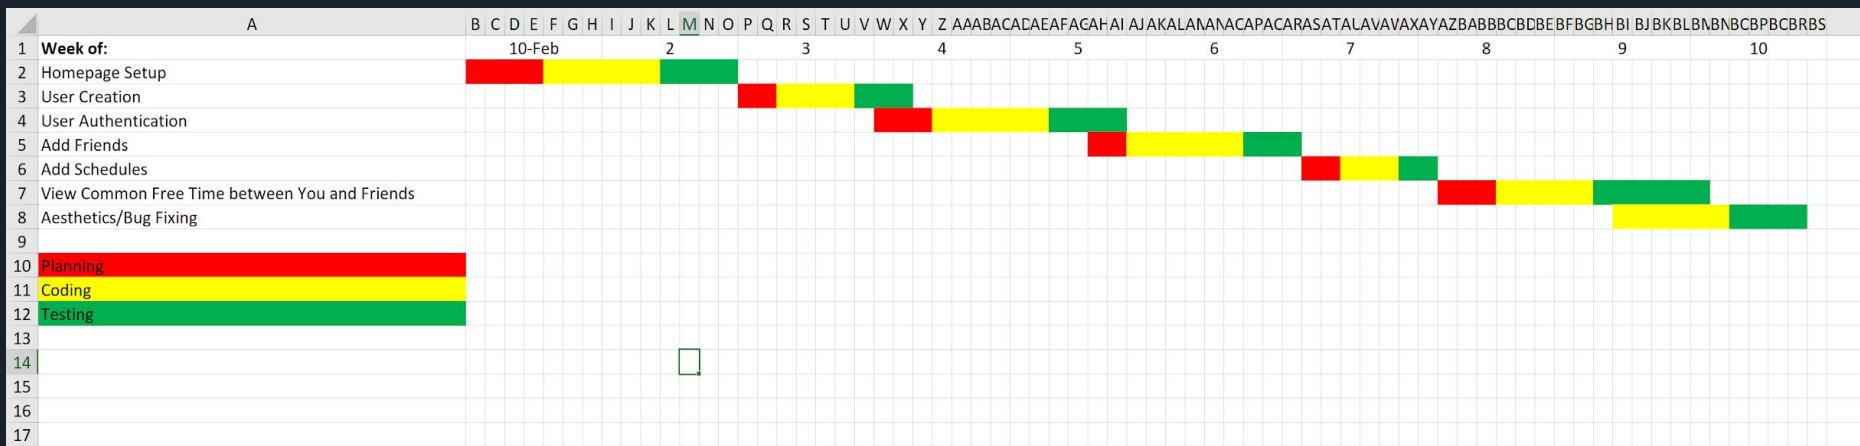

Demo!

Tools Used

- Project Tracker: Excel (See Gantt Chart on next slide).
  Usefulness: ★★★☆☆

This is a slightly updated Gant chart of our progress. We followed this order of feature development but smudged the deadlines a bit.

Tools Used

- Version Control: GitHub

Usefulness: ★★★★★

Tools Used

- Database: Postgres, DataGrip

Usefulness: ★ ★ ★ ★ ★

Tools Used

- Testing Tool: Manual Testing

 Usefulness: ★★★★☆

Tools Used

- Deployment Environment: LocalHost

Usefulness: ★★★☆☆

Tools Used

- **IDE:** Atom, Visual Studio, Emacs

  Usefulness: ★★★★☆

Tools Used

- Framework: Node.js

  Usefulness: ★★★☆☆

Tools Used

- Hardware: Windows, Mac, Linux

  Usefulness: ★ ★ ★ ★ ★

Methodologies

- Agile
- Code Review
- General testing

Challenges Encountered

- Original plan - Flutter/Mobile App
- Going completely remote for Coronavirus!
- Difficulties working with postgres/ switch to DataGrip
